INFLATION MARINE

WORK-REST-PLAY

SEMI RIGID PLATFORMS

A GREAT WAY TO EXPERIENCE MORE OF
YOUR BEACH DAY OR BOATING GETAWAY

SPECIFICATIONS

Platforms are constructed from a double layer reinforced drop stitch PVC for maximum strength and durability.

High-grade stainless steel D-rings attached in each corner for easy tie down points and also two on each end of the raft so it can be towed.

Although Inflation Marine will customise and build or configure a design to our client's needs our 3.5m long by 1.5m wide with a 6-8 persons capacity raft is most popular.

Our platforms are equipped with a 240v air pump for easy inflation/deflation.

The entire raft rolls up to fit in a zip bag for easy storage.

Total deflated size of about 1.6mx30cm weighing 27kg.
